

Matrix of Care

Last update 19.01.2024

The design of the health care network within the certification is subject to the requirements of the Catalogue of Requirements. This leads to the verification of registered cooperation partners of specific specialties and other specialties that cannot be registered (yet) in the Master Data Sheet.

The requirements in this document called Matrix of Care are not organ specific. At OnkoZert, the Matrix of Care is the basis for the formal consideration of the Master Data Sheet.
